

Anabol EXT

Maximum Strength Hormone Support†

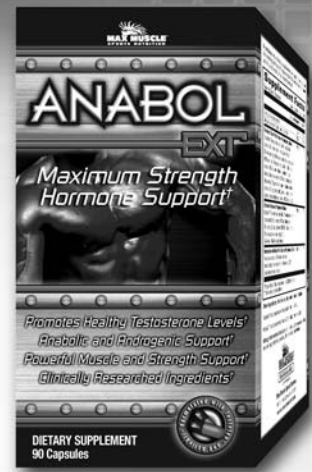

MMSN takes it to the next level by bringing you **Anabol EXT**. **Anabol EXT** is a totally unique and scientifically-based product designed to support natural testosterone while blocking unwanted estrogen and increasing endurance and sexual performance. This unique and extreme formula has the combination of minerals, herbals and nutraceuticals selected for their maximum strengths and precise ratios and formulated to exceed your expectations.

Anabol EXT contains both Zinc aspartate and Magnesium aspartate, both essential minerals in the production of testosterone. In addition, **Anabol EXT** delivers three potent proprietary blends for male enhancement.

The **Anabol EXT** Extreme Male Performance Proprietary Blend (MPPB) contains Testofen™, a fenugreek extract standardized to contain at least 50% fenusides. Testofen™ is a powerful and clinically proven ingredient shown to increase muscle mass, increase levels of free testosterone by 98%, increase libido, reduce abdominal fat and increase energy levels. These results have been scientifically substantiated and published in numerous peer-review publications. The MPPB also contains maximum strength Horny Goat Weed (*Epimedium grandiflorum*, standardized to contain 40% icariins) to boost to your male libido and hormones, *Rhodiola rosea* (standardized to contain 3% rosavin), Maca Extract (*Lepidium meyenii*, standardized to contain 0.6% macamides and macaenes) for improved endurance and stamina, *Pygeum africanum* (standardized to contain 12% phytosterols) and Saw palmetto berry extract (standardized to contain 45% fatty acids) to support healthy prostate function.

The **Anabol EXT** Extreme Anabolic Proprietary Blend (APB) contains the premier ingredient LJ100™ ActiveAli™ standardized to contain bioactive glycosaponins, euryptides and polysaccharides for maximum testosterone support. Published clinical studies have shown that ActiveAli™ is a potent modulator of testosterone production to support ensuring enough free testosterone for the body's need. The APB

Size: 90 Capsules
Serving Size: Three (3) Capsules
Servings Per Container: Thirty (30)

KEY FEATURES

- Promotes Healthy Testosterone Levels†
- Anabolic and Androgenic Support†
- Powerful Muscle and Strength Support†
- Clinically Researched Ingredients†

KEY MESSAGES

- Contains the chelated trace minerals Zinc aspartate and Magnesium aspartate essential in the synthesis of testosterone†
- Formulated with the Extreme Male Performance Proprietary Blend (MPPB) containing Testofen™, a clinically supported fenugreek extract shown to increase testosterone, muscle mass, increase libido, reduce abdominal fat and enhance energy†
- Contains the Extreme Anabolic Proprietary Blend (APB) with the clinically tested LJ 100™ ActiveAli™ also known as *Eurycoma longifolia* standardized extract or Long Jack. ActiveAli™ has been shown to support healthy testosterone and cortisol levels for an overall anabolic balance†
- Contains an Anti-Estrogen Proprietary Blend with red clover extract, DIM (diindolymethane) and Chrysin to maximize testosterone and minimize estrogen (anti-aromatase) effects†
- Scientifically-based and maximum strength formula

TARGET MARKET

Primary: Bodybuilders and athletes seeking to maximize muscle size and strength, testosterone production and minimize estrogen levels.

Secondary: Men seeking more energy, stamina, libido, and sexual benefits.

To report any adverse events call 1-800-332-1088.

(Continued from Page 1)

contains Tribulus terrestris (standardized to contain 40% protodioscin) to support the production of normal Luteinizing Hormone (LH) produced by the pituitary gland. Luteinizing Hormone stimulates your testes to produce testosterone. Rhaponticum carthamoides delivers 20-Hydroxy Beta-ecdysterone, a potent protein partitioning agent and muscle supporting compound that stimulates the body's ability to utilize protein for muscle growth. Muira Pauma (Ptychopetalum olacoides, 10:1 extract) is known as an aphrodisiac. 5-Methyl-7-Methoxy Isoflavone is revered as a flavone that can support protein synthesis and reduce cortisol levels from normal stress. Stress, lack of sleep, aging, and a poor diet negatively affect your testosterone production. Together the ABP is unparalleled in its composition, potency and completeness.

The **Anabol EXT** Anti-Estrogen Proprietary Blend (AEB) contains three ingredients all aimed at decreasing the conversion of testosterone to estrogen (anti-aromatase) and the effects of estrogen at the receptor sites. These include red clover extract (Trifolium pretense, standardized to contain 8% isoflavones), DIM (diindolymethane) and Chrysin.

Suggested Cycle:

Min Cycle: 6 weeks

Max Cycle: 12 weeks

Suggested Off Cycle: 4 weeks

This formula is unlike any other on the market. Available exclusively at Max Muscle Sports Nutrition.
