

Double Strength Probiotic Complex

WITH ACIDOPHILUS

Overview

Double Strength Probiotic Complex with Acidophilus contains a unique combination of several key microorganisms designed to support and maintain the gastrointestinal tract's microflora. Probiotics are defined as live microorganisms that may beneficially affect the host upon ingestion by improving the balance of the intestinal microflora. The dietary use of live microorganisms has a long history dating back thousands of years. The father of modern immunology, Élie Metchnikoff, spoke highly about the possible health benefits of the lactic acid-bacteria (LAB) *Lactobacillus bulgaricus* and *Streptococcus thermophilus* in his writings at the turn of the 20th century, stating that consumption of live bacteria, such as *Lactobacillus bulgaricus* and *Streptococcus thermophilus*, was beneficial for gastrointestinal health, as well as for health in general, and for longevity. Recent research suggests that certain live microorganisms may promote healthy immune function and have anticarcinogenic effects, as well as other health benefits.

The gastrointestinal tract represents a complex ecosystem in which a delicate balance exists between the intestinal microflora and the host. The intestinal microflora are important for maturation of the immune system, the development of healthy intestinal function and in order to maintain a balanced inflammatory response. The microflora reinforce the barrier function of the intestines, helping in the prevention of the attachment of microorganisms capable of causing disease and the entry of allergens. Some members of the microflora may contribute to the body's requirements for certain vitamins, including Biotin, pantothenic acid and Vitamin B12.

Our Double Strength Probiotic Complex with Acidophilus utilizes freeze dried cultures and is shelf stable; refrigeration is recommended after opening.

Research Indicates

- » Promotes healthy immune function
- » Supports a balanced inflammatory response
- » Promotes healthy intestinal function particularly against lactose intolerance and rotavirus-induced diarrhea in infants and children

Recommended Dosage

- ✓ Take 1 capsule, two times daily.

Cautions

- Alteration of the microbial flora of the intestine associated with antibiotic use, disease, and aging can negatively affect its beneficial role; therefore consult a health care practitioner before use.

Supplement Facts

Serving Size: 1 Vegetarian Capsule

Amount Per Serving	% Daily Value
Probiotic Blend (at time of manufacture) *	
Lactobacillus acidophilus	3.2 Billion CFU
Lactobacillus bulgaricus	400 Million CFU
Bifidobacterium bifidum	200 Million CFU
Streptococcus thermophilus	200 Million CFU

* Daily Value not established

Other ingredients: Rice flour, cellulose, silicon dioxide, magnesium stearate.

Contains milk ingredients.
